SMART PORT CHALLENGE 2020

MRC Hosting Pte. Ltd.
Singapore

Groundup.ai (a MRC Hosting company) uses cutting-edge Artificial Intelligence and data analytics technology to create innovative solutions for the shipping, freight, heavy machinery and construction industry.

Our solutions enable our clients to:
1. Prevent unplanned downtime in their operations.
2. Extend the lifespan of their assets and machinery.
3. Save costs from unnecessary maintenance works.
4. Predict machinery failure before it happens
5. Increase safety of their environments.

Our predictive algorithms, computer vision and machine learning technologies are industry leading and have been deployed across hundreds of use cases for the following reasons:
1. Proven track record of adapting our solutions to a variety of industries.
2. Our prediction algorithms rank among the highest in the industry.
3. We help clients to develop a unique strategic edge.
4. Speed-to-market 3X faster due to pre-trained industry specific AI brain.
5. Complete flexibility and customisation depending on the challenge statements and use case.
